A POPULATION FORECASTING ANALYSIS

We have empathized the thoughts, feelings and actions of the people regarding the growth of Global population.

The population of a geographic area grows or declines through the interaction of fertility, mortality, and migration.

-Punnagai

Future pop are of analysts, scientists, a

-Malathi

Future population trends are of interest to analysts, policymakers, scientists, and planners in industry and government.

-Lakshmi

Population projections to gauge future demand for food, water, energy, services, and to forecast future demographic characteristics.

-Punnagai

Global and national trends in population size are used to estimate the future demand for food, water, and energy.

-Lakshmi

Forecasts may be based on large quantities of current and historical data.

-Malathi

Population forecasting consists of mathematical models.

-Shalini

The number of individuals living within that specific location determines the population density.

Sources of forecastes

they are public and

private sectors

forecasts.

-Anam Firdaus

Members of a population often rely on the same resources, and have similar environmental constraints.

-Anam Firdaus

People feel that Earth is

over populated and

there might be crisis

over resources in future.

-Anam Firdaus

population forecasting is very important to know growth rate and estimate future population of particular area.

-Shalini

POPULATION used to

They are used to analyse changes in population numbers.

-Shalini

The people tend to have family planning and The Government introduces schemes to control over growing population.

-Anam Firdaus

It is a geometric increase method based on hypothesis the rate changes population

-Malathi

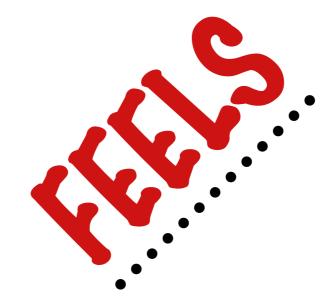

Human population growth over time is constrained by environmental, social, political, and economic factors.

-Lakshmi

Method is accurate for forecasting population for sound and rapidly increasing Geometrical increase method

-Punnagai

The users are no experts in statistics or forecasting and therefore lack the methodological and demographic background to completely understand methods.

-Lakshmi

The population analyst has generally been concerned with forecasting the future populations of whole countries

-Punnagai

Utilization of data filters number of calculation fields and number of visualization or graphs.

-Shalini

Population changes reflects the change in aggregate of other factors births, deaths and migration.

-Malathi
